Summary

OXM Exchange is a new centralized exchange and trading platform, A complete Multi Chain operating aimed at bridging the gap between humans and the cryptocurrency market And improve the trading experience. In an effort to become its centralized exchange and trading platform.

The platform will be designed to provide all the benefits of centralized money, Time to bring the traditional centralized financial experience and equipment onboard.

High leverage, low slippage and low cost of crypto resources and much more.

The team behind the OXM exchange is setting a clear and definite perspective of involvement Fine planning for project development. Our vision is to create the most decentralized and community driven platform.

The DeFi industry, where every single user plays an important role in decision making. Process by playing an effective role in defining and structuring OXM exchanges And its future development.

Our long-term outlook will set us apart from other startups. Long-term reliability of the platform and continued benefits for OXM holders. (Local BSC Token on OXM Exchange) is our ultimate goal.

OXM Exchange is introducing itself as a strong actor in DeFi, planning fast. Growth, sustainable expansion and aggressive business practices.

We do Understand that such plans and goals require constant innovation, high flexibility

And market adaptability.

Our team is ready for the challenge. This article introduces the OXM Exchange, a new trading platform with its features, Products, facilities and development plans

OXM Exchange

Overview

Centralized cryptocurrency exchanges offer many advantages

Anonymity and peer-to-peer transactions. But many are complex to use and authorization and suffer from inconvenient registration processes.

OXM Exchange provides a solution to all that, along with a set of great features and products and aims to become the Centralized exchange and trading platform of choice.

The core features of OXM exchange consist of on-chain Derivatives trading on.

Crypto assets as a start (with a plan to expand into other assets in the future)

Staking, Farming, NFTs, Vaults, Exchange Pro and a unique on-chain Governance interface for holders to decide the future of the project

OXM Exchange how does work

Cryptocurrency exchanges are platforms that facilitate the trading of cryptocurrencies for other assets, including digital and fiat currencies. In effect, cryptocurrency exchanges act as an intermediary between a buyer and a seller and make money through commissions and transaction fees.

A Centralized market uses various digital devices to communicate and display bid/ask prices in real-time. In this way, buyers, sellers, and dealers do not need to be located in the same place to transact securities.

In the usual order book, there is a list of ask and bid orders stored in a map object, for convenient matching orders.

However, due to the limitation of a smart contract working on EVM, We have to store data in an efficient way.

There is a matching engine called Manager which holds a liquidity bitmap -a map of pip and liquidity. Each price is represented by a pip, Pip is an acronym for "percentage in point" or "price interest point"

A pip is the smallest price move that an exchange rate can make based on market convention.

OXM Exchange

OXM Exchange is a sophisticated and innovative version of the classic.

Swap/Exchange/DEX interface that includes many parameters and utilities that improves the quality of the users interface, provides more data on the dashboard and optimizes the use of the platform.

Using OXM Exchange will allow you to have in hand a multitude of tools,visulas and key statistics (Tokens Charts, Instant Swap,KPI,etc.)

And to have direct and quick access to your assets to trade and swap with ease.

The screenshot displays the OXM Exchange interface with three main sections: Trade, Buy Order, and Sell Order.

Trade Section:

- Asset: Bitcoin (Price: 480.2, Rate: -0.0662%/hr, Volume: 175k)
- Amount: 0.00
- Price: 0.00
- Fee: 0.00
- Total: 0.00

Buy Order Section:

Price	Amount	Total
33.8	0.32	\$ 33.568
77.6	0.42	\$ 33.568
54.4	0.12	\$ 33.568
12.3	0.43	\$ 33.568
44.8	0.65	\$ 33.568
87.9	0.21	\$ 33.568
45.7	0.22	\$ 33.568
87.9	0.21	\$ 33.568
33.8	0.32	\$ 33.568

Sell Order Section:

Price	Amount	Total
33.8	0.32	\$ 33.568
77.6	0.42	\$ 33.568
54.4	0.12	\$ 33.568
45.7	0.22	\$ 33.568
87.9	0.21	\$ 33.568
12.3	0.43	\$ 33.568
44.8	0.65	\$ 33.568
87.9	0.21	\$ 33.568
45.7	0.22	\$ 33.568

At the bottom, there is a 'Buy' button (green) and a 'Sell' button (red). A footer contains a checkbox and placeholder text: 'Lorem ipsum dolor sit amet, consectetur adipiscing elit'.

OXM Protocol

What is OXM Token ?

OXM Protocol is OXM Exchange's native BEP20 token empowering its ecosystem. In addition to being a utility token and providing liquidity and trading incentives, OXM token is designed to facilitate and incite the Centralized governance of the protocol. As such, holders of OXM tokens accrue voting rights proportional to their.

Deflationary Token:

Controlling the price of OXM as well as the total circulating supply of tokens will be our top priority. OXM Exchange's team is implementing several anti-inflation.

Measures to keep OXM stable, encourage holding and ensure the best benefits of the OXM community. The measures include Anti-whale to prevent price manipulation, set a harvest lock. Up period to prevent farming arbitrage bots from constantly harvesting and dumping in addition to constant buying back and burning of OXM tokens and reducing block emission.

OXM Exchange will be running highly cost-effective incentive programs and initiatives to help facilitate and ensure the continuous growth of the platform and the OXM community. In the meantime, the OXM token will be the perfect vehicle for encapsulating and representing the value of the OXM Exchange's economy and ecosystem, and the collective value of the platform will be shared equitably.

NFTs in DeFi

NFTs are the next promising trend in the world of DeFi. It helps to expand the market.

Of collaterals in DeFi lending. In fact, a DeFi lending and borrowing platform requires collaterals. These collaterals are generally the crypto holdings. With the introduction of NFT, one can now put other types of assets as collateral. For example, an artwork or a real estate property can be tokenized as NFTs and put up as collaterals. The use of NFT goes beyond the realm of collaterals. These products can be insurances, bonds, or options. In insurance, each contract is converted into NFT. These NFTs can be traded on a secondary market. Another DeFi model that has been adopted in the world of NFTs is the issuance of governance tokens. Many platforms and NFT marketplaces have started issuing

OXM Exchange is introducing NFTs as one of the major features of the protocol users can mint NFTs with unique characteristics and different rarities by depositing process and will not be related to the amount of OXM used.

The NFT feature will be developed over time with several use cases to be included in order to improve the NFT experience in our protocol. As the OXM casted in NFTs are locked for a period of time, the NFT pool APY will always be the highest in the

OXM NFTs will increase and the value of these unique cards might reach unpredictable levels.

In insurance, each contract is converted into NFT. These NFTs can be traded on a secondary market.

Another DeFi model that has been adopted in the world of NFTs in the issuance of governance tokens. Many platforms and NFT marketplaces have started issuing and distributing their governance tokens

Tokenomics

35% Farms & Pools: The 30% of the OXM tokens will be dedicated to the community through staking and farming rewards. This is one of the highest shares addressed to the community in the existing protocols!

15% Liquidity: The tokens will be immediately available for the general functioning of the for liquidity provide.

5% Airdrop: OXM tokens reserve on the Airdrop as a total step. Participants registered in the whitelist lottery and took part in the exclusive.

25% Team & Advisors: The tokens will be available to the team immediately but will be minted over time. OXM Exchange's team will retain a position of 10% of any newly minted token ensuring a community driven and fair launch.

10% Dev Wallet: lock

10% Management: The use of our OXM tokens to manage the market properly is immense. And by doing so, OXM token price is able to be up.

35%
Farming & Pools

15%
Liquidity

10%
MM & OXM Team

25%
Partnership & Advice

10%
Dev Wallet

5%
Airdrop

Total supply of OXM tokens is 10,000,000 tokens and usage.

Governance

When we are building OXM protocol, we want the community to be able to actively use the token, participate in governing decisions, and contribute to the ecosystem. Instead of building an exchange token for the sake of building one, we want the token to bridge the community and our team.

OXM token holders are empowered to participate in the process of making decisions in OXM Exchange. This includes all modifications on contract specifications, add/drop features and functions, and even corporate decisions such as the supporting of hard forks of tokens, handling extreme situations, etc. Every token holder has the same rights, those with more tokens will have a bigger influence.

OXM Exchange's Governance system is happening fully on-chain. It allows OXM holders to propose, vote and decide the future developments of the project. Being a real actor in the decision process is one of the values of OXM Exchange in line with the project spirit.

This version will serve as the base of the governance system and users will be able to experience the interface and get familiar with its global functioning. The more OXM you hold, the higher is the power of your vote and give it more chances to lean towards the big holders' orientations.

Once the Derivatives Trading Protocol Mainnet is released, we will be able to include some ameliorations in the governance system. At this point, only Tokens held in wallets will Farms, Vaults. This will be a step forward to engage the whole community in the decision process of OXM Exchange.

Roadmap

2021:

- *Website Launch*

2022:

- Air Drop
- Liquidity Provide
- Listing on Coingecko & Coinmarketcap
- NFTs Program
- Listing on Major Exchanges
- Farms & Pools

2023:

- Buyback And Burn
- Decentralized Ecosystem Launch
- Mobile App V1

2024:

- Listing Apply For Binance
- OXM Blockchain Development Start
